SUPPLEMENTARY INFORMATION:

I. Abstract

This request is an extension of a current information collection.

National Marine Fisheries Service (NMFS) requires United States (U.S.) fishing vessels registered for use with, or any U.S. citizen issued with, a Special Coral Reef Ecosystem Fishing Permit (authorized under the Fishery Management Plan for Coral Reef Ecosystems of the Western Pacific Region), to complete logbooks and submit them to NMFS. The information in the logbooks is used to obtain fish catch/fishing effort data on coral reef fishes and invertebrates harvested in designated low-use marine protected areas and on those listed in the regulations as potentially-harvested coral reef taxa in waters of the U.S. exclusive economic zone in the western Pacific region.

These data are needed to determine the condition of the stocks and whether the current management measures are having the intended effects, to evaluate the benefits and costs of changes in management measures, and to monitor and respond to incidental takes of endangered and threatened marine animals. NMFS Fishery Management Plans are developed per Section 303 of the Magnuson-Stevens Fishery Conservation and Management Plan.

II. Method of Collection

Information is submitted to NMFS in the form of paper logbook sheets and paper transshipment forms within 30 days of each landing of coral reef harvest.
